}

① . compute the time complexity using frequency count for the following snippets.

a). for(i=1; i<10; i=i+2) → 12
{
i=i&10; → 2×5
printf("%d",i); → 1×5 +5
}

12+5+5 = 22
= 22

b). i=1; → 1 unit
while(i<=50); → 51
{
printf("hello"); → 50
}

→ 101

c). for(i=1; i<=20; i++); → 21 = 21

d). for(i=1; i<=n; i=i++){
printf("hello");
printf("world");

1+n+1+n+n+n+n-

```
printf("i = %d", i);
}
```
